

CURRICULUM VITAE

Name: Stanko Nikolić, Ph. D.
Birth Date: 21. 04. 1982.
Nationality/Citizenship: Serbian
Marital status: Married, two children
Telephone: + 381 63 290 200
E-mail: stanko.nikolic.21@gmail.com

Education

2008 - 2014: PhD Physics

Faculty of Physics, University of Belgrade, Serbia (www.ff.bg.ac.rs)

Doctoral Thesis: "*Electromagnetically Induced Transparency and Slow Light in Rubidium Buffer Gas Cell*"

(Award: Best doctoral thesis in the Institute of Physics Belgrade in 2014.)

2007 - 2008: M.Sc. Physics

Faculty of Physics, University of Belgrade, Serbia

Modules: Numerical Algorithms and Their Implementation in C, Quantum and Nonlinear Optics, Quantum Cryptography and Computation

2001 - 2007: B.Sc. Physics

Faculty of Physics, University of Belgrade, Serbia

Graduation Thesis: "*The application of an acousto-optic modulator for amplitude modulation and switching the laser beam in red and infrared region*"

1997 - 2001: Mathematical High School, Belgrade, Serbia (<http://www.mg.edu.rs/en>)

Current Positions

2007 - present: Institute of Physics Belgrade, University of Belgrade, Serbia (www.ipb.ac.rs)

(*Senior Research Associate* since September 2020)

- Experimental work in the field of Electromagnetically Induced Transparency, Slow Light, Storage of Light and Free Induction Decay in Rb buffer gas cell
- Developing of the FPGA digital design, C++ software and LabView projects for full control of the experiment by personal computer, data acquisition and data processing. Experimental control includes several tasks: 1. Programming the digital-to-analog converters by FPGA chip to generate analog voltage signals by entering mathematical expressions (as strings) in C++ application that communicates with FPGA board, 2. Programming the analog-to-digital converters by FPGA for acquiring voltage signals from experiment, 3. Visualization of input voltage signals in the oscilloscope form in C++ GUI, 4. Analyzing the experimental results by C++ application

2013 - present: External Researcher, Karolinska Institutet, Stockholm, Sweden (<http://www.cmm.ki.se>)

- Developing of the Windows C++ application (GUI) for control of the experiment in the field of multifocal fluorescence correlation spectroscopy. The software has several tasks: 1. Communication with two single-photon sensitive cameras, each containing 32 x 32 matrix of independent avalanche-photodiodes (pixels), 2. Graphical presentation of raw data (2048 independent photon counts over time on both cameras), 3. Calculation of 1024 auto-correlation (ACF) and 24576 cross-correlation functions (CCF), both serially on CPU and in parallel by using CUDA platform on NVIDIA graphical processor (computational time reduced over 60 times), 4. Drawing the graphs, diffusion maps and histograms from ACF and CCF, and 5. Conducting the fitting procedures over all ACF and CCF in order to numerically characterize biological samples

2001 - present: Associate Software Developer at firm "SANB" d.o.o. Belgrade, Serbia

- Developed, deployed and maintained software (using Embarcadero/Borland C++ Builder and MySQL for client-server database system) for corporate and government clients: The Account of Salary and other Benefits and Profits, Financial and Commodity Bookkeeping, Managing the Work of Warehouse and Depositary of Goods, Wholesale and Retail (team of 3)
- Implemented features for generating Microsoft Excel spreadsheets reports from DBMS using Embarcadero/Borland C++ Builder and VB macros (team of 2)

September 2012 - present: Teacher in Physics, Mathematical High School, Belgrade, Serbia (several independent engagements over years)

- Advanced curriculum for children talented in computing, mathematics and physics (top 2% pupils in Serbia - the school with High National Distinction Status)

Previous Positions

October 2015 - July 2019: Postdoctoral Research Associate, Texas A&M University at Qatar (www.qatar.tamu.edu) (several independent engagements, total of 2 years 4 months)

- Research in the field of theoretical nonlinear optics - Calculating the analytical, numerical and Talbot carpet solutions of the Nonlinear Schrödinger Equations (NLSE) hierarchy (standard NLSE, Hirota, Quintic equation etc), analysis of modulation instability and Fourier spectra and visualization of obtained solutions. Developing CUDA C software for massively parallel numerical calculations

May - July 2016: Teaching Assistant (Course 208 - Electromagnetism and Optics) at Science Department, Texas A&M University at Qatar

2009 - 2010 (six months): Visiting student at Center for Ultracold Atoms at Massachusetts Institute of Technology, Cambridge, USA (group of professor Vladan Vuletić) <http://www.rle.mit.edu/people/directory/vladan-vuletic/>

- Designed and developed a device for photons detection. Besides projecting digital electronic circuit, the project consisted of a FPGA digital design (in Verilog) that enabled Xilinx Spartan-3 FPGA Module to count electrical photon pulses and send the data to digital-to-analog converter. User interface program was developed in Microsoft Visual Studio 2008 (C#)
- Designed software for optimization of an optical system in order to obtain chromatic dispersion compensation in one of the group experiment

Independent software projects

2019: Financial and Commodity Bookkeeping, Managing the Work of Warehouse and Depository of Goods. Program works with MySQL server enabling multiuser control. Application contains more than 100 modules for inserting, modifying and reporting data

2017: Developed and maintained a Photonics conference website: www.photonica.ac.rs (including HTML, PHP and MySQL)

2015: Developed a software module in the *Account of Salaries* project for generating confidential .PDF documents showing employees' salaries and sending them to personal E-mail addresses

2014: *Trading beverages* - Developed a specialized software for maintaining the database with records of: business partners, articles, import/export invoices and warehouse inventory for trading of beverages, with variety of reports

2013: *Telephone book* (in Borland C++ Builder): Developed my own DBMS and associated software for fast inserting, modifying, deleting and listing of the phone numbers in larger geographic area (more than 2,500,000 records)

2005: *VAT (Value Add Tax) calculator* (in Borland C++ Builder): Developed software for calculating VAT and generating tax reports for private and corporate parties. Implemented my own DBMS

Additional experience

2019 - Completed "*Machine learning*" course on Coursera: <https://www.coursera.org/learn/machine-learning>

2013 - Attended the course "*Database design and programming with SQL*" by Oracle Academy and got the certificate to teach the basics of database design and programming in high schools

2012 - Attended "*Cineca Summer School of Parallel Computing*" (two weeks), Casalecchio di Reno - Bologna, Italy

Computer skills

- *Programming:* Pascal, C/C++, Borland/Embarcadero C++ Builder and Delphi, Visual Basic, FPGA digital design (VHDL and Verilog), Microsoft Visual Studio 2008, NVIDIA CUDA, PHP
- *Algorithms:* Dynamical programming, graph theory, searching arrays and dynamical structures
- *Databases:* Interbase, MySQL
- *Software:* MS Office (Excel, Access, Word, Power Point), Origin, LaTeX, Adobe Photoshop, Corel Draw

Languages: Serbian (mother tongue), English (fluent)

APPENDIX

Scientific production (Publications in Peer Reviewed International Journals)

22. Sho Oasa, Aleksandar Krmpot, **Stanko Nikolic**, Lars Terenius, Rudolf Rigler, Vladana Vukojevic
"Mapping the Spatiotemporal Heterogeneity of Biomolecules Concentration, Mobility and Local Environment in Live Cells using Quantitative Time-Resolved Confocal Fluorescence Microscopy Imaging Without Scanning and Fluorescence Lifetime Imaging Microscopy",
Biophysical Journal **118**, 307A (2020).
